WHO ARE WE?

WITH OVER 11 YEARS OF IMPECCABLE

track record, servicing organizations and institutions across various industries, we are your one-stop shop for software development solutions. Based in Alberta, Canada, Digital Fractal Technologies has helped over 100 organizations from startups to large-scale enterprises all over the globe on their digital transformations. Additionally, we have championed transitions from outdated legacy application software to intuitive software applications for hundreds of companies.

Our services cut across sectors and industries such as construction, energy, trucking, governments, etc. We understand the uniqueness of each business. Hence, we provide custom solutions to suit the needs of each client. Our solutions have streamlined internal company processes and have immensely improved our clients' bottom-line by eliminating drawbacks in their daily business-critical operations.

WHY THE TRUCKING INFORMATION MANAGEMENT SOLUTION?

RUCKING BUSINESS TRUCKING BUSINESS CAN ONLY GET EASIER WHEN YOU ARE USING DIGITAL FRACTAL TRUCKING INFORMATION MANAGEMENT SOLUTION.

Digital Fractal TMS is designed bearing efficiency, usability, and scalability in mind. The software's structure is based on a data-driven analysis, which considers all the components and factors that make up (and those which could make up) the day-to-day operations of a trucking company. The solution doesn't only boost the efficiency of today's processes; it also takes some steps forward to address probable activities that a trucking company could adopt in the future to maximize their operations. Our trucking management solution provides efficiency for trucking companies that translates into dollar savings in todays competitive business landscape

DIGITAL FRACTAL TMS, YOU CAN:

- Consolidate all documentations. Upload, save, and view all needed documents, certificates, permits and more in one place.
- Effortlessly dispatch jobs to drivers and track progress in real-time
- Capture timesheet information live from the field
- Provide a work alone or journey management module
- Track profitability and accountability using performance indicators.
- Manage permits, certificates tickets and ensure they are always valid and up to date
- Communicate with your staff one a unified system
- Effectively manage vehicle information and track fuel card usage
- Get detailed reports for management

Digital Fractal TMS ensures that all data transferred to and from the software are secured.

One of our customers after utilizing our trucking management system, has been able to manage over 400 employees and dispatch and capture all paperwork in realtime. A scenario that could easily be regarded as a logistics nightmare before the use of the Digital Fractal Trucking Management System. Today, these clients can take on larger projects, employ more workforce and expand their employees' capabilities while making things a lot easier than they were ever before.

OUR INNOVATIVE TECHNOLOGY POSITIONS OUR CLIENTS

to always set market trends and stay ahead of their competitors, spurring faster revenue growth. On paper, running a trucking business is incredibly complex. With an industry-leading trucking management solution such as ours, it is a walk in the park.

VEHICLE MANAGEMENT SYSTEM

Keep track of your vehicles, trailers, and other trucking assets. Manage your permits, certificates, compliances, and documentations.

Furnish your drivers with the latest documentation (insurance, permits, etc.) on the go, without having them stop by the office, request, or wait for it. The system provides you with detailed reports and notifies you of expired documents in real-time. Also, you can manage repair lists and other information about your vehicles and assets.

EMPLOYEES & TRADE TICKETS

Manage all your employee information as well as your truck drivers using the employee information manager. Upload paystubs, set rates, access fuel cards, and upload tickets and certificates to their profile. Activate reminder capabilities for expiring documents.

DIGITAL FORMS -UPLOADED IMMEDIATELY

Ditch the physical binders. Upload your manuals, procedures, and fillable forms to the app from the backend and make them available to your drivers and other employees. Submitted forms are uploaded to a central platform, which with one click, allows access to all listed users. In the absence of an internet connection on the end user's device, the submission is queued and automatically uploaded when an internet connection is detected. Workflows and custom reports can be set up to allow for quick and easy analysis of collated data.

JOB DISPATCHING

Dispatch jobs to your truckers with instructions, customizable checklists, and required equipment. Dispatchers can use the mobile or web app to assign jobs to your employees. Comprehensive custom reports can be generated for management and billing. You also get to track when jobs were started and completed.

WORK ALONE AND JOURNEY MANAGEMENT

The Work Alone and Journey Management capabilities aim to improve employee safety when they are traveling alone or working remotely by enabling a check-in and monitoring functionality that updates the driver's whereabouts on the go and keeps dispatchers informed.

CREW SCHEDULES

Assign trucks and work/ training to your employees, so they know which days of the week they are on the job.

TIMESHEETS

Comprehensive timesheet management module that matches your processes can integrate with systems like Axon or Microsoft Dynamics for payroll calculations and transfers. Allow time entry, attachments, job categorization, and more. Approve timesheets, reject or request approval from managers.

ANNOUNCEMENTS

Utilize the TMS personalized audience feature to communicate with your drivers and other employees. Send messages to specific users, departments, or specific groups. Keep everyone informed of company updates and request feedback for specific messages. Send attachments and other media types to employees.

REPORTS & DASHBOARDS

Generate custom reports for all data within your system, including vehicle repair status, fuel card usages, mileage, and others. Schedule reports to be sent by email or manually downloaded.

CUSTOMIZATIONS

Digital Fractal Truck management app is a flexible solution that can be tailored to suit your unique business needs. It can be hosted on-premise and comes with a web-based command center compatible with iOS devices. Additional features can also be developed.
